PROFESSIONAL
SUMMARY

A Software Developer (Full Stack) with over 8 years of hands-on experience in the design and implementation of data driven Web applications for the humanitarian sector. Skilled in building scalable backend services and responsive front-end interfaces using TypeScript, JavaScript, React.js, Angular, .Net, Node.js, Python, PHP. Adept at using SQL(PostgreSQL, MySQL), SOQL, & NoSQL(MongoDB) to support data management, optimization & cross-platform synchronization. Experienced in different design patterns, ORM patterns, containerization (Docker), cloud-based development, RESTful apps, and automated testing. Proactively embracing AI-assisted development tools to improve productivity and code quality. Specialising in M&E & GMS apps but also able to adapt quickly to new projects and deliver high-quality solutions. Seeking to join UNOPS as an ICT Senior Officer - Software Developer.

TECHNICAL SKILLS

Prog. Languages	JavaScript, TypeScript, Python, C#, PHP
Frontend	Angular, AngularJS, React, Tailwind
Backend	NodeJS, .NET, PHP Laravel
Databases	Relational Databases: MySQL, PostgreSQL; NoSQL:MongoDB; SOQL, Databricks
Integration	Boomi, Power Platform
Other tech skills	Windows/Linux OS, Agile-Scrum methodology, Version control with Git, Bitbucket & Github , Containerization with Docker, Salesforce CRM, Cursor & Copilot for AI coding assistants, Bug tracking with Jira , Documentation with Confluence , Bundling with Webpack & Gulp , API client testing with Postman , Azure Cloud Services, Data integration with Boomi , RESTful APIs

WORK EXPERIENCE

Software Developer	
Apr 9, 2019 - Present	Food for the Hungry Inc. https://www.fh.org/ Sector: INGO
Projects	- Worldlink - https://wl3.fh.org/ :- an M&E and GMS app used for donor and award management, data collection, and progress tracking of field programs. ➤ JS, Angular, AngularJS, PHP, Laravel, MySQL, PostgreSQL, docker - Vision - https://vision.fh.org/ :- a software tool that utilizes AI (Azure Computer Vision) for face and body recognition, and perform automatic processing of child photos from field offices to reposition and align them according to the organization's standards.. ➤ pug, jQuery, NodeJS, express, MSSQL, axios, Mocha, docker - OVAS - https://dmz-volunteerapp-a01.fhdmz.org/ :- a volunteer management platform designed for FH staff to register and manage volunteers who do not have email addresses; it allows assigning unique IDs, linking with devices, and generating scannable badges. ➤ React, TypeScript, Tailwind, React Query, Router - Exported - a custom standalone Node.js middleware which listens to platform events from Salesforce, run SOQL based ETL, and generates CSV outputs, and writes processed data back to Salesforce. - Salesforce - https://foodforthehungry.my.salesforce.com/:- CRM to manage sponsors, children, sponsorship, and donations enabling tracking and dynamic association between sponsors and beneficiaries. ➤ Apex, LWC, SOQL
Responsibilities	• Develop, maintain, and deploy enterprise web applications (Worldlink, OVAS, Vision) including implementing new features, enhancing existing functionalities & UX, troubleshooting and fixing bugs. • Deliver salesforce solutions by implementing Apex changes for functionality and LWC enhancement to improve UI & UX.

- Built Vision app with AI-assisted feature (Azure Computer Vision) for automated data processing, photo recognition, and intelligent workflows.
- Develop and maintain APIs, middleware, and integrations for data fetching and flow; also utilize Boomi automation tool, for automated data flows between Salesforce and internal platforms.
- Design and optimize relational databases (MySQL, PostgreSQL, MSSQL), implemented ETL processes, and ensure data accuracy across systems.
- Manage deployments using bitbucket pipeline and docker; also handle documentation on confluence.

Achievements

- ✓ Built a custom middleware, **ExportEd**, that listens to Salesforce Platform Events, performs SOQL-based ETL, and delivers zipped CSV outputs back to Salesforce, replacing a Boomi-managed process and resulting in annual **subscription cost savings of over \$10,000**.
- ✓ Ensured company-wide access to **accurate and reliable data** by validating Sponsorship, Child, and Media datasets, resolving discrepancies, and running daily data synchronization processes across three platforms, **enabling informed and data-driven decision-making**.
- ✓ **Optimized wl3's performance** by improving loading speed after reducing file sizes, utilizing caching techniques and implementing lazy loading.
- ✓ **Implemented a Single Source of Truth for the grant system** in wl3. This allowed to manage grant-related data from its inception through termination.
- ✓ **Successfully implemented a hybrid Angular-AngularJS app** and gradually migrated the angularJs codebase into angular.
- ✓ **Migrated to Google Identity Services JS library** (which is based on OAuth2.0 and JWT), enabling users to continue using Google login after Google Sign-In web solution JS library was deprecated.
- ✓ Integrated PowerBI into our grants module to **allow data visualization for informed decision making**.

Front-end Developer

Sept 2018 - Apr 2019

Zerihun Associates Plc.

<https://ethiopiaillc.com/>

Sector: IT Consultancy

- Developing a web-based ERP application called Z-plusERP, which integrated Human Resources, Payroll, and Attendance management systems.
 - Using TypeScript, Angular 6 framework and NodeJs.

Responsibilities

- Developing responsive UIs
- Adding feature specific components
- Identifying and resolving bugs
- Creating unit tests
- Contributing to REST API
- Preparing documentation & user manual

Achievements

- ✓ Setting up Initial Design elements for the application and selecting the appropriate tech stack to meet project requirements.
- ✓ Configuring the App and the skeletal structure of the repository.
- ✓ Choosing the user interface components that align with the overall design and user experience goals.

Software Developer

Feb 2015 – Aug 2016

Advanced Defense Concepts (ADC) R&D

<https://www.adcethiopia.com/>

Sector: R&D

- Developing microcontroller-based applications used in the agriculture sector.
 - Using C, C#, .Net, Proteus and Multisim.

Responsibilities

- Develop web portal for controller-based applications.
- Programming ICs and Microcontrollers such as LCDs, Thermostat, Inverter...
- Designing schematic for different electrical devices and PCB Layouts

Achievements

- ✓ I led the integration of different submodules to form an automated cohesive system.

Nov 2014 - Feb 2015

Frontend Developer

iCogLabs

<https://icog-labs.com/>

Sector: R&D

- Developing a web app of a tele-health project called MedElert (Medical-Electronic-Alert) that enabled doctors and pharmacists to remotely set medication schedules on pill-dispensers, alerting caregivers if patients miss doses.
 - Using JS/AngularJS and RESTful architecture.

Responsibilities

- Developing the web-portal
- Translating mock-ups into UI
- Testing application (manually)
- Debugging and addressing issues
- Collaborating with backend developers

EDUCATION

Master of Engineering in Information & Communication Engineering

University of Electronic Science and Technology of China (电子科技大学), Chengdu, Sichuan, China

GPA: 3.94

Bachelor of Science in Electrical and Computer Engineering

Addis Ababa University, Addis Ababa, Ethiopia

Major GPA: 3.21

NOTABLE PROJECTS

- | | |
|---------------|---|
| FH Salesforce | - CRM for managing sponsors, beneficiaries, sponsorships, and donations (LWC, Apex, SOQL) |
| Worldlink | - M&E & GMS web-app (Angular,PHP,Laravel,Mysql,Postgres, Jasmine,docker, Azure) |
| ExportEd | - A middleware that listens to SF PE, performs SOQL ETL, writes CSV outputs to SF (Node) |
| OVAS | - Internal app to manage volunteers (React, TS, ReactQuery, Router) |
| Vision | - AI Photoprocessing app (pug, jQuery, NodeJS, express, MSSQL, axios, Mocha, docker) |
| EthioCom | - E-commerce Website (React, Typescript, Redux, Bootstrap) |
| ZPlusERP | - HR, Attendance and Payroll web-app (TypeScript,CSS,Angular,NodeJS) |
| i/o simulator | - Simulator to visualize uC input/output (C#, .Net, C) |
| Thermostat | - A device that detects and displays temperature change (C, Thermocouple, LCD, MCU) |
| MedElert | - A web portal for tele-health project (JS,AngularJS,HTML,CSS) |

PERSONAL SKILLS

Language

English – Proficient/Fluent

Soft Skills

- Cross-cultural I had the chance of working, learning and living with people from diverse skills: cultural backgrounds. This has allowed me to enhance my intercultural competence in multicultural work setup.
- Leadership: I had taken the role of acting team leader on various occasions where I managed and led different team projects.
- Adaptability: I am adept at quickly learning new technologies and frameworks, allowing me to seamlessly adapt to new projects and contribute effectively.

ADDITIONAL INFO

Certifications and Awards

- Completed freeCodeCam.org JavaScript Algorithms and Data Structures course.
- Outstanding International Student award participant.
- Academic Achievement Awards – 2nd class winner.
